www.la-toulousaine.com

With our exclusive assembly systems and accessories, your garage door will bring you new comfort and security.

Your house will be better insulated and your façade more harmonious with our 7 different curtain styles and multiple attractive finishes.

LE PLUS LA TOULOUSAINE LE PLUS

Contrôle à la norme européenne en vigueur EN 13241-1

OPENINGS

Overhead Opening

- With extension or torsion springs
- Provides better sealing
- Frees up space on side walls
- Gives a new touch to your façade

Side Sliding

- Pedestrian crossing or wicket door in opposite side
- Frees up ceiling space
- Keeps the traditional style of your home
- Lower aluminium threshold

Rolling Opening

- Frees up space on walls and ceiling
- Motorised doors
- Double-walled lacquered aluminum insulated slats
- 1st rolling door certified NF

INSULATION

For effective insulation, we use only 40-mm thick insulated panels (U: 0.51 W/m²K).

Sealing is ensured by brush or lip seals (according to opening type). You will feel the difference immediately when you replace your old garage door.

Panel for sectional door

Slats for rolling door

COMFORT

You can choose between traditional hinges or tandem bearings.

They enhance your garage door with an attractive modern design and silent mechanical operation.

Traditional hinge

Tandem bearings

MOTORISATIONS

Comfort: Take advantage of the remote control to operate your door comfortably seated in yoour car. (2 remote controls included)

Safety: With self-learning and obstacle detection devices, your family can easily and safely move around the garage with ease.

Security: The self-locking function offers real protection against intrusions.

SPECIAL OPTIONS

Built-in wicket door

A genuine door within a door, this option allows you to access your garage without using the operator.

With as many locking points as panels, no need to worry about intrusions. The centring system ensures efficient performance and sealing over time.

PRODUCTS
YOU CAN RELY ON

LA TOULOUSAINE, 60 YEARS OF TRUST AND RELIABILITY

Over the past six decades La Toulousaine has gained considerable expertise in designing quality closure solutions you can rely on.

Our technical center and industrial premises are based in Toulouse, France, a city at the forefront of European engineering.

More than three hundred skilled technicians, designers and operators work together to provide our customers with the best products and solutions.

Sixty years of history also means we have developed a trusted network of qualified independent technicians to install our products, because a good product needs to be installed and maintained expertly.

With more than a million solutions keeping homes and businesses secure throughout Europe, La Toulousaine is a top-of-the-range standard in the industry.
